

ProAssign ACT™ Catalyst

Consultative Sales & Business Development

With a wide range of products and services available to professional clients, there is an increasing need to deliver a service that adds value at a variety of levels to a their business.

The technical and complex nature of many current products and services requires a method of selling that is less transactional and more consultative and developmental for the client. This approach gives a deeper and more lasting business commitment and growth.

Establishing a consultative selling approach into the core of an organisation and into the psyche of a sales-force requires a paradigm shift with the development of the sales process itself into that of a business consultancy.

With ProAssign ACT™ Catalyst programme, the sales-team & organisation become trusted advisors to the client and are able to develop and customise their expertise and grow their business using a new mind-set model.
